Chapter 1 – Introduction

Overview

The Tennessee Department of Revenue has implemented an electronic filing program for all Motor Fuel Distributor Accounts. Section 67-3-1806, T.C.A., gives the Commission of Revenue the authority to require motor fuel reports by means of Electronic Data Interchange (EDI). All payments accompanying these reports must be remitted by means of Electronic Funds Transfer (EFT). The EFT registration must be submitted prior to the implementation of the EDI program. If you have not completed your EFT registration, please see the section on EFT Registration. Letters of notification on EDI requirements and EFT payments have been sent to all Motor Fuel Distributors.

The Tennessee Department of Revenue has now expanded the electronic filing program to include all motor fuel accounts. These additional accounts include Exporters, Blenders, Terminal Operators, and Transporters. Letters of notification on EDI requirements and EFT payments have been sent to all Motor Fuel account licensees.

General Information

Electronic Data Interchange (EDI) is the electronic exchange of business documents from one company's computer to another company's computer in machine-processable formats. The direct, computer-to-computer exchanged of business information alleviates the expense associated with processing paper (opening envelopes, logging in of documents, etc.) as well as the costs, errors and time delays associated with data entry. Companies in industries of all kinds have found that EDI makes tremendous economic sense. Government agencies such as the Tennessee Department of Revenue naturally see the value in reducing the paper-intensive component of motor fuels taxation by implementing EDI.

Advantages

Using EDI will result in a reduction of paperwork and its associated costs.

- Tennessee Department of Revenue will send quick acknowledgment of tax filing via the EDI 997 - Functional Acknowledgment.
- EDI will eliminate postal delays and associated late filing penalties.
- Fuel tracking will be computerized, giving the Tennessee Department of Revenue tools to reduce fraud, and therefore giving honest fuel distributors an even playing field.
- Detailed audit trail of both the tax return and the payment.

This EDI Implementation guide follows version 4030 of the EDI ANSI ASC X.12 standards. This guide's purpose is to assist you in implementing and filing EDI for motor fuel returns and reports.

E-mail for filing: TDOR-EDI.MotorFuels@state.tn.us

Understanding EDI

EDI is used extensively in industry. For example, the retail and manufacturing industries cut purchase orders, send invoices, process shipping notifications, and make payments; all electronically. The time saved and accuracy gained using EDI gives businesses a competitive advantage, reducing lead-time, and vastly reducing data entry errors. It also reduces the need to store reams of paper documents for future reference.

EDI may seem complex, but once the basics are understood, the concept is really quite simple. As stated earlier, EDI is a method to electronically exchange business documents using a standard format. To facilitate this exchange of documents, two things are needed. First, the taxpayer (or trading partner) needs a method to send and receive electronic documents. Second, the taxpayer needs software to translate schedules and tax returns into the standard EDI format. This software is also used by the taxpayer to interpret the electronic filing ‘receipt’; which in EDI terms is termed a 997 - Functional Acknowledgement.

EDI 813 Version

Tennessee is using the ANSI ASC X12 Version Release 004030 EDI standards for the EDI 813 (Electronic Filing of Tax Return Data) transaction set. Many states have implemented, or are planning on implementing, the EDI 813 for motor fuel tax filing. Previous releases of the EDI 813 transaction set allowed for individual state variations in EDI filing. Version 4030 promotes uniformity in motor fuel tax filing. As states migrate to the 4030 version, filers will be able to create a more generic EDI map, reducing the effort needed to track individual state variations.

EDI Filing Options

Often trading partners exchange business documents using VANs (Value Added Networks). A VAN acts as a post office for EDI trading partners with each partner having a mailbox where they can drop off and pick up EDI documents. EDI documents are enclosed in electronic envelopes, containing routing information to identify both the sender and the recipient.

The disadvantage of using a VAN is the expense. With the advent of the internet, the cost associated with using a VAN has been eliminated.

The Tennessee Department of Revenue accepts EDI documents filed by one of two methods; either as an e-mail attachment, or sent via FTP (File Transfer Protocol). These methods are outlined below:

E-Mail

Taxpayers who choose E-Mail as their file transfer options will simply e-mail their EDI files to:

TDOR-EDI.MotorFuels@state.tn.us. The acknowledgement (EDI transaction set 997) will be sent from the State via e-mail to the sending e-mail address.

FTP

Taxpayers who choose FTP as their file transfer option will be given access to send and retrieve files from a State FTP server. Access to this server from outside the State's network must be via VPN (Virtual Private Network). Taxpayers who wish to use this method, or those who want more information about this method, should call or e-mail either:

Bill Shanko

Bill.Shanko@state.tn.us

(615) 741-8386

John Loupe`

John.Loupe@state.tn.us

(615) 741-8352

FTP Directory Structure:

The base directory name will be assigned by the Tennessee Department of Revenue for each taxpayer.

Within the base directory will be two subdirectories:

SUB (directory where the filer will submit their EDI 813 files)

ACK (directory where the filer will pick up their EDI 997 files)

EDI File Naming Convention

Regardless of the file transfer option chosen, the EDI file should be named using the following conventions:

Original Filing (Initial transfer to State)

Company Name +

Filing month (three character abbreviation) +

Filing year +

'T' (test filing) or 'P' (production filing) +

'TN' +

' .txt'

Example: MyOilCompanyMAY2002PTN.txt (production)

MyOilCompanyMAY2002TTN.txt (test)

Corrected Filing (When filing corrections requested by state)

Company Name +

Filing month (three character abbreviation) +

Filing year +

'T' (test filing) or 'P' (production filing) +

'C' +

Count of corrections (1, first correction; 2 second correction, etc) +

'TN' +

' .txt'

Example: MyOilCompanyMAY2002PC1TN.txt (production)

MyOilCompanyMAY2002TC1TN.txt (test)

Amended Filings

Company Name +

Filing month (three character abbreviation) +

Filing year +

‘T’ (test filing) or ‘P’ (production filing) +

‘A’ +

Count of amended filings (1, first amended filing; 2 second amended filing, etc) +

‘TN’ +

‘.txt’

Example: MyOilCompanyMAY2002PA1TN.txt (production)

MyOilCompanyMAY2002TA1TN.txt (test)

EDI File Structure

One file structure must be created for each license type you are required to file under. For example, if you have both a Distributor and Terminal Operator License, you must create two separate ST loops (ST segment through SE segment) one for Distributor, and one for Terminal Operator. If you are licensed for multiple terminals in Tennessee, you must report each terminal under a separate ST-SE loop. You may put all file structures under one ISA envelope or you may create a separate envelope for each file structure. Please note that since the ISA envelope indicates whether an EDI file is Test or Production; test filings must be separated from production filings by creating separate envelopes and separate files.

Required EDI Filing

The following returns must be filed via EDI:

PET 350 - Distributor Return

PET 368 - Blenders Return

PET 372 - Petroleum Products Terminal Return

PET 373 - Petroleum Products Transporter Return

PET 374 – Annual Terminal Return

PET 377 – Exporter Tax Return & Claim for Refund

EDI Timely Filing

The due date for filing your tax return and schedules via EDI is on or before the 20th of the month following the month of activity. This means your EDI filing must be both transmitted and received by the Tennessee Department of Revenue on or before the 20th. EDI filing must be accompanied by payment via Electronic Funds Transfer (EFT). Please refer to the appendix on EFT.

EDI Testing Procedures

Following are the steps that will be followed for testing your EDI tax filing.

1. Contact Bill Shanko, TDOR Information Technology Resources, with any questions on EDI Transmission methods.
2. You must continue to mail your tax returns and schedules to the Tennessee Department of Revenue until notified in writing that you no longer have to file paper returns and schedules. Note that if you are licensed as both a distributor and another taxpayer type (Exporter, Blender, Petroleum Transporter, Terminal Operator), you may be filing the Distributor Return as production EDI (paperless), but Test EDI (still required to file paper) for other returns.
3. Transmit your first EDI test file, using valid data for a full tax period.
4. Verify receipt of an EDI 997 - Functional Acknowledgment. See the section on Functional Acknowledgments for more information.
5. TDOR personnel will check your return and schedules filed via EDI against the paper returns previously submitted.

6. TDOR personnel will then notify you of the results of your test filing. They may require corrections before authorizing you to submit the next period's test file.
7. Submit an EDI file for the subsequent month. If your first EDI filing covered the May 2002 tax period, your second test file should be for the June 2002 tax period.

EDI Production Filing Procedures:

1. All Distributors are required to have at least 2 months of consecutive successful "test" filings before December 2001, to avoid penalty. The taxpayer will also be required to file paper returns until otherwise notified by the Department of Revenue. The "paper" return will be considered the "production report" during this time period.
2. All Terminal Operators are required to have at least 2 months consecutive successful "test" filings before **January 2003**, to avoid penalty. Terminal Operators will be required to file paper returns until otherwise notified by the Department of Revenue. The "paper" return will be considered the "production report" during this time period.
3. The Annual Terminal Operator Return must be tested prior to **January 2003**. The first production filing for the Annual Terminal Operator Return will be December 2003. Terminal Operators will be notified in writing when the Annual Terminal Operator Return has been authorized for production.
4. All Blenders, Exporters, and Transporters are required to have at least 2 months of consecutive successful "test" filings before **March 2003**, to avoid penalty. The taxpayer will also be required to file paper returns until otherwise notified by the Department of Revenue. The "paper" return will be considered the "production report" during this time period.
5. Taxpayers will be notified in writing by the Tennessee Department of Revenue when they no longer are required to submit paper. A letter will be mailed to the address the taxpayer entered on the 'Registration for Motor Fuel Tax Electronic Filing' form. **Until notified, you must continue to send paper returns and schedules.**
6. When authorized for production, the taxpayer will be instructed to change its filing status from "test" to "production". Taxpayers should not change filing status until notified in writing by the Department.
7. A filing is considered successful when all required fields (including all schedule information) are complete, as determined by the Department of Revenue. No longer will the taxpayer be allowed to submit returns without completed schedules.
8. If a taxpayer decides to change its EDI filing method (i.e., certified software provider, web filer, internal EDI) then the taxpayer will be required to file the "production report" under the old method while filing a "test report" under the new method for a period of time to be determined by the Department. The Department will then notify the taxpayer when to stop filing under the old method and begin filing in "production" under the new method. All requests to change filing methods must be made in writing to the Department for approval.

EDI Acknowledgments

Normally taxpayers will receive an EDI 997 (Functional Acknowledgment) within two business days of transmission of your EDI tax filing. By checking the EDI 997, you'll know that your filing was received and whether it passed EDI syntax checks. If you do not receive an EDI 997 within two business days, e-mail the Tennessee Department of Revenue at TDOR-EDI.MotorFuels@state.tn.us. If an EDI 997 is not received within two business days, it is the taxpayer's responsibility to follow up with the Tennessee Department of Revenue.

Please note that receipt of an EDI 997 only signifies that the EDI tax filing was received by the Tennessee Department of Revenue; it does not signify that the electronic return and schedules were an acceptable filing. The electronic return and schedules will be checked further for accuracy. The Tennessee Department of Revenue will contact you if there are any questions regarding your return, or if any corrections are required.

EDI 997 File Naming Convention

The EDI 997 File will be named to match the EDI 813 Tax Filing, with the exception that the extension will be named .ack instead of .txt. So an EDI 813 with the file name MyOilCompanyMAY2002TTN.txt will be acknowledged with an EDI 997 with the file name MyOilCompanyMAY2002TTN.ack.

Chapter 2 – EDI Separator Requirements

Separator Requirements

Type	ASCII Value	EBCDIC Value	Character
Segment Terminator	5C	E0	\
Element Separator	7E	A1	~

813 Electronic Filing of Tax Return Data

FUNCTIONAL GROUP: TF

This Draft Standard for Trial Use contains the format and establishes the data contents of the Electronic Filing of Tax Return Data Transaction Set (813) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used by tax filers to electronically file tax returns with a federal, state, or local taxing authority and which may initiate payments related to the tax return.

FTA Motor Fuel Tax Section Uniformity Committee

The Combined Reporting map is based on Uniform Forms adopted by the Uniformity Committee of the Motor Fuel Tax Section of the Federation of Tax Administrators. This map is consistent with ANSI ASC X12 version 4030 standards

The Tennessee Department of Revenue's Implementation Guide for the Distributor return was submitted to the Electronic Commerce Sub-committee for review September 22, 2000.

Element ID	Elem Ref #	Sub-Ele Ref #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
BTI01	128		M	Reference Number Qualifier	ID	2	2	“T6” = Defines as Tax Filing
BTI02	127		M	Reference Number	AN	3	3	Determined by FTA “050” = All Fuels Tax Filings
BTI03	66		M	ID Code Qualifier	ID	2	2	“47” = Tax Authority
BTI04	67		M	ID Code	AN	2	20	“TN0001” = Tennessee Department of Revenue agency code.
BTI05	373		O	Transaction Create Date	DT	8	8	“CCYYMMDD” = Transmission Date
BTI06	818		O	Name Control ID	AN	4	4	First 4 positions of Taxpayer’s Legal Business Name. If business name is less than 4 characters, left justify name control and pad with “*”.
BTI07	66		C	ID Code Qualifier	ID	2	2	“24” = FEIN Federal Employer Identification Number “34” = Social Security Number
BTI08	67		C	ID Code	AN	9	9	Taxpayer’s FEIN or SSN
BTI09	66		C	ID Code Qualifier	ID	2	2	“49” = State (assigned) Identification Number
BTI10	67		C	ID Code	AN	2	20	Taxpayer Account Number 110 Prefix – Blender 250 Prefix – Distributor 285 Prefix - Exporter

								830 Prefix - Terminal Operator 870 Prefix - Transporter
BTI11 and BTI12 are not used.								
BTI13	353		O	Transaction Set Purpose Code	ID	2	2	Options: "00" = Original "05" = Replace "15" = Resubmission
BTI14	640		O	Transaction Type Code	ID	2	2	Options: "6R" = Resubmission "CO" = Corrected "6S" = Supplemental
BTI07 must be the FEIN if the taxpayer has one. Submit a SSN only for sole proprietorships that have not been issued a FEIN.								
The application of BTI13 and BTI14 are as follows: BTI13 should be used when the taxpayer transmits their initial return (BTI13 should be used without BTI14); BTI14 should be used when the taxpayer transmits modifications (BTI14 should be used without BTI13). This is a recommendation of the Motor Fuel Uniformity Committee, not a requirement of X12. Further clarification of these elements is located below.								

Element	Application
BTI13 [Initial Return]	
"00" = Original	Use "Original" when first attempt to transmit your return to the department, no matter if the Department receives your return.
"05" = Replace	Use "Replace" when first attempt of transmitted return had corrupted data.
"15" = Resubmission	Use "Resubmission" when the Department did not receive first attempt of your transmitted return.
BTI14 [Amended Return]	
"CO" = Corrected	Use "Corrected" when adjusting or correcting original or amended return.
"6R" = Resubmission	Use "Resubmission" when first attempt to transmit amended return was not received by the Department.
"6S" = Supplemental	Use "Supplemental" when transmitting new or additional data not included in original or amended return.

Transaction Set - Supplier/Distributor Report (SDR)

This TFS loop reports the return amount for the Supplier/Distributor's fuel tax report.

One or more TFS loops report the return amounts not available or calculable from schedules.

Beginning of Supplier/Distributor Report Detail Tax Form Segment								(Required) Pos. No. 0100
Element ID	Elem Ref. #	Sub-Ele Ref. #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
TFS01	128		M	Reference Identification Qualifier	ID	2	2	"T2" = Tax Form Code
TFS02	127		M	Reference Identification	AN	1	30	"SDR" = Supplier/Distributor Report
TFS~T2~SDR								

Relationship to the Transaction Information Reference Segment								(Required) Pos. No. 0200
Element ID	Elem Ref. #	Sub-Ele Ref. #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
REF01	128		M	Reference Identification Qualifier	ID	2	2	"SU" = Special Processing
REF02	127		C	Reference Identification	AN	3	3	IRS = IRS Data N/A = If not applicable to the IRS
REF~SU~N/A								

Sequence Error ID Number Reference Number Segment								(Required) Pos. No. 0200
Element ID	Elem Ref #	Sub-Ele Ref #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
REF01	128		M	Reference Identification Qualifier	ID	2	2	06 = Sequence Error ID Number
REF02	127		C	Reference Identification	AN	1	7	Sequence Error ID Number. Incremented by 1.
REF~06~1								

Condition 1 - If account has no activity this segment is required. The Condition 2 DTM, TIA and FGS Loop is not used.

No Activity Reference Number Segment								(Conditional) Pos. No. 0200
Element ID	Elem Ref #	Sub-Ele Ref #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
REF01	128		M	Entity Identification Code	ID	2	2	"BE" = Business Activity
REF02	127		C	Name	AN	1	1	"1" = No Activity
REF~BE~1								

Condition 2 - If account has activity the DTM, TIA and FGS Loop are required. The Condition 1 REF is not used. This FGS loop contains the individual items from the face of the return that are not derived from schedules. The FGS loop is repeated when the product code value changes.

Ending Inventory Date Date/Time Reference Segment								(Conditional) Pos. No. 0300
Element ID	Elem Ref #	Sub-Ele Ref #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
DTM01	374		M	Date/Time Qualifier	ID	3	3	"184" = Inventory Date
DTM02	373		C	Date	DT	8	8	"CCYYMMDD"
Use this segment when reporting ending inventory in the FGS Loop for the supplier/distributor.								
DTM~184~20010131								

Total Due Tax Information and Amount Segment								(Conditional) Pos. No. 0920
Element ID	Elem Ref. #	Sub-Ele Ref. #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
TIA01	817		M	Tax Information ID Number	AN	4	4	"5003" = Total Due
TIA02	782		C	Monetary Amount	R	1	15	Dollar Amount
TIA03 is not used.								
TIA04	380		C	Quantity	R	1	15	Quantity
TIA05	355		M	Unit of Measurement Code	ID	2	2	"GA" = Gallons
Total Due is passed in this segment as a check value. Dollar Amount represents total remittance amount from page 1, line 12 of the return Quantity represents the sum of net gallons across all schedules for all products.								
TIA~5003~9876.45~14000~GA								

Physical Inventory by Product Form Group Segment								(Conditional) Pos. No. 1000
Element ID	Elem Ref. #	Sub-Ele Ref. #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
FGS01	350		M	Assigned Identification	AN	2	2	"BI" = Beginning Inventory

Transaction Set - Blender (BLN)

The Blender Return is using the SDR map. Following is specific mapping used to report the Blender Return.
This TFS loop reports the return amount for the Blender's fuel tax report.
One or more TFS loops report the return amounts not available or calculable from schedules.

Beginning of Blender Report Detail								
Tax Form Segment								Pos. No. 0100
Element ID	Elem Ref. #	Sub-Ele Ref. #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
TFS01	128		M	Reference Identification Qualifier	ID	2	2	"T2" = Tax Form Code
TFS02	127		M	Reference Identification	AN	1	30	"BLN" = Blender Report
TFS~T2~BLN								

Relationship to the Transaction Information								(Required)
Reference Segment								Pos. No. 0200
Element ID	Elem Ref. #	Sub-Ele Ref. #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
REF01	128		M	Reference Identification Qualifier	ID	2	2	"SU" = Special Processing
REF02	127		C	Reference Identification	AN	3	3	IRS = IRS Data N/A = If not applicable to the IRS
REF~SU~N/A								

Sequence Error ID Number								(Required)
Reference Number Segment								Pos. No. 0200
Element ID	Elem Ref #	Sub-Ele Ref #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
REF01	128		M	Reference Identification Qualifier	ID	2	2	06 = Sequence Error ID Number
REF02	127		C	Reference Identification	AN	1	7	Sequence Error ID Number. Incremented by 1.
REF~06~1								

Condition 1 - If account has no activity this segment is required. The Condition 2 TIA and FGS Loop is not used.

No Activity								(Conditional)
Reference Number Segment								Pos. No. 0200
Element ID	Elem Ref #	Sub-Ele Ref #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
REF01	128		M	Entity Identification Code	ID	2	2	"BE" = Business Activity
REF02	127		C	Name	AN	1	1	"I" = No Activity
REF~BE~1								

Condition 2 - If account has activity the DTM and TIA Loop are required. The Condition 1 REF is not used.

Ending Inventory Date								(Conditional)
Date/Time Reference Segment								Pos. No. 0300
Element ID	Elem Ref #	Sub-Ele Ref #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
DTM01	374		M	Date/Time Qualifier	ID	3	3	"184" = Inventory Date
DTM02	373		C	Date	DT	8	8	"CCYYMMDD"
Use this segment when reporting ending inventory in the FGS Loop for the blender.								
DTM~184~20010131								

Total Due Tax Information and Amount Segment								(Conditional) Pos. No. 0920
Element ID	Elem Ref. #	Sub-Ele Ref. #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
TIA01	817		M	Tax Information ID Number	AN	4	4	"5003" = Total Due
TIA02	782		C	Monetary Amount	R	1	15	Dollar Amount
TIA03 is not used.								
TIA04	380		C	Quantity	R	1	15	Quantity
TIA05	355		M	Unit of Measurement Code	ID	2	2	"GA" = Gallons
Total Due is passed in this segment as a check value. Dollar Amount represents total remittance amount from line 16 of the return (tax due). Quantity represents the sum of Blender net gallons across all schedules for all products.								
TIA~5003~123.45~~11400~GA								

End of TFS loop (BLN detail)

Blender Summary Information

This TFS loop begins the Blender summary Information

Tax-Paid Beginning Inventory

Beginning of Summary Information Tax Form Segment								(Required) Pos. No. 0100

Transaction Set - Exporter (EXP)

The Exporter Return is using the SDR map. Following is specific mapping used to report the Exporter Return. This TFS loop reports the return amount for the Exporter's fuel tax report. One or more TFS loops report the return amounts not available or calculable from schedules.

Beginning of Exporter Report Detail								
Tax Form Segment								Pos. No. 0100
Element ID	Elem Ref. #	Sub-Ele Ref. #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
TFS01	128		M	Reference Identification Qualifier	ID	2	2	"T2" = Tax Form Code
TFS02	127		M	Reference Identification	AN	1	30	"EXP" = Exporter Report
TFS~T2~EXP								

Relationship to the Transaction Information								
Reference Segment								(Required) Pos. No. 0200
Element ID	Elem Ref. #	Sub-Ele Ref. #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
REF01	128		M	Reference Identification Qualifier	ID	2	2	"SU" = Special Processing
REF02	127		C	Reference Identification	AN	3	3	IRS = IRS Data N/A = If not applicable to the IRS
REF~SU~N/A								

Sequence Error ID Number								
Reference Number Segment								(Required) Pos. No. 0200
Element ID	Elem Ref. #	Sub-Ele Ref. #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
REF01	128		M	Reference Identification Qualifier	ID	2	2	06 = Sequence Error ID Number
REF02	127		C	Reference Identification	AN	1	7	Sequence Error ID Number. Incremented by 1.
REF~06~1								

Condition 1 - If account has no activity this segment is required. The Condition 2 TIA and FGS Loop is not used.

No Activity								
Reference Number Segment								(Conditional) Pos. No. 0200
Element ID	Elem Ref. #	Sub-Ele Ref. #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
REF01	128		M	Entity Identification Code	ID	2	2	"BE" = Business Activity
REF02	127		C	Name	AN	1	1	"1" = No Activity
REF~BE~1								

Condition 2 - If account has activity the TIA is required. The Condition 1 REF is not used.

Total Due								
Tax Information and Amount Segment								(Conditional) Pos. No. 0920
Element ID	Elem Ref. #	Sub-Ele Ref. #	Field Status	Field Name	Field Type	Length		Field Description
						Min	Max	
TIA01	817		M	Tax Information ID Number	AN	4	4	"5003" = Total Due
TIA02	782		C	Monetary Amount	R	1	15	Dollar Amount
TIA03 is not used.								
TIA04	380		C	Quantity	R	1	15	Quantity
TIA05	355		M	Unit of Measurement Code	ID	2	2	"GA" = Gallons
Total Due is passed in this segment as a check value. Dollar Amount represents total remittance amount from page 1, line 15 of the return (tax due) or Line 16 of the return (overpayment) Quantity represents the sum of Exporter net gallons across all schedules for all products.

Appendix A – Taxpayer Registration

The Tennessee Department of Revenue has previously sent mailings to all Distributors outlining requirements for EDI filing. EDI filing requirements for Blenders, Exporters, Terminal Operators and Transporters were sent in February of 2002. Within this section is a registration form for Motor Fuel Tax Electronic Filing. If you have not yet completed the registration form and faxed it to the Tennessee Department of Revenue, you should do so immediately.

On the registration form, filing method must be selected. Once you've selected a filing method, all requests to change filing method must be made in writing to the Tennessee Department of Revenue for approval.

Filing Methods are outlined as follows:

Overview:

The State of Tennessee has contracted with ZyTax, a subsidiary of FuelQuest, to provide several services for our EDI program. We offer five (5) different methods of EDI filing for motor fuels. When determining which method is best for your company, please consider all motor fuel accounts for which you are licensed, such as exporter, terminal operator, transporter, or blender accounts. These accounts will be added to the EDI program in the future and should be considered when making a determination of which method is most appropriate for your company. When considering the following methods, it is important to determine the total number of transactions you report each month. A transaction is defined as any line entry on an accompanying schedule, such as a shipment, sale, or diversion. If you need additional help in determining which method is best for your company, you should contact Ray Grigsby at (615) 532-6914. The methods available are:

FV or Full ZyTax Version. These filers are existing ZyTax clients who have licensed the entire Motor Fuel Excise Tax Compliance and Reporting Package (Enterprise Version) from ZyTax or taxpayers who may choose to license this software from ZyTax. Often taxpayers who file in multiple states choose the Enterprise version. This method is recommended for those taxpayers who have over 500 transactions per month. If you are interested in licensing this version or would like more information, contact ZyTax directly: Dan Zeise (920) 617-7604 or Kay Ullmer (920) 617-7618.

Express Version. The filers who have agreed to this method will be shipped via FedEx, a CD, installation instructions, and user documentation prior to the first filing. The State of Tennessee will provide the initial software at no cost to the taxpayer, and we will also incur all support and enhancement costs for Distributors through June 30, 2002. Beginning July 1, 2002, ZyTax software support will be the financial responsibility of the Distributor. These filers will be provided with phone support for installation and setup requirements, as well as technical support. *On site setup and training is not included.*

Exporters, Blenders, Terminal Operators and Transporters will be provided initial software at no cost to the taxpayer and the State of Tennessee will also incur all support and enhancement costs through December 2003. Beginning January 2004, ZyTax software support will be the financial responsibility of the Blender, Exporter, Terminal Operator or Transporter.

Minimum System Requirements:

Windows NT Service Pack 5.0 or greater

-or-

Windows 98 (SR2/Release 2)

-or-

Windows 2000 Service Pack 1 or greater (128 MG RAM)

CD ROM

Internet Explorer 5.5 or greater

Pentium II 500 MHZ

64 -128 MG RAM

300 MB unused Hard Disk Space

With this version, filers are required to key the schedules into the software; however, several support/dropdown tables are included. Schedules and returns can be printed or the data exported. The EDI files can also be viewed, exported, or printed. Filers have the option of licensing additional reporting jurisdictions, import functionality and other features for the ZyTax

Express version by contacting the software provider. The Express system is recommended for companies that have less than 500 total transactions each month. (The state is covering the first year cost for all interested taxpayers; the second year of support of \$500.00 is the responsibility of the filer.) If you are interested in discussing additional features, such as data import or ExSTARS capabilities, contact ZyTax directly: Dan Zeise (920) 617-7604 or Kay Ullmer (920) 617-7618.

Web. These filers will be provided with the web site address. Minimum software requirements are: Internet Explorer 5.0 or higher and an e-mail account/address. The filer will be required to key schedule data into the system, and there will be minimal dropdown tables included. Exporting schedule data as well as printing schedules and returns is available. Web filing is recommended for filers who have less than 100 transactions per month. Costs for this method are outlined in the notification letter sent by the Tennessee Department of Revenue.

Fax. The taxpayer will fax their returns(s) and schedules directly to ZyTax, and ZyTax personnel will enter the schedule information into their system to be transferred to the State of Tennessee. The toll free support number for ZyTax Fax is (800) 508-3001 and their fax number is (520) 752-2626. The return must be faxed to ZyTax by the 15th of each month. Costs for this method are outlined in the notification letter sent by the Tennessee Department of Revenue.

Other. These filers will either develop their own software internally or contract with an outside vendor to provide them with EDI software. If you choose this method, the State of Tennessee will send you a copy of the EDI Implementation guide.

Appendix B - EFT Registration

EDI filing of Motor Fuel Reports must be accompanied by payments remitted via EFT (Electronic Funds Transfer). Letters were sent earlier regarding EFT registration.

The Tennessee Department of Revenue offers two methods for electronic payment. These are:

- Automated Clearing House Debit (ACH Debit)
- Automated Clearing House Credit (ACH Credit)

These options are available through the Automated Clearing House (ACH) system to electronically transfer tax payments. The ACH system is a nationwide network for handling electronic payments and is used by most financial institutions and corporations.

On the following pages are EFT payment procedures and a registration form for Electronic Funds Transfer. If you have not yet completed the EFT registration form and faxed it to the Tennessee Department of Revenue, you should do so immediately.

ACH Debit

Department of Revenue Recommended Option

This is What Happens:

Business Day Before
Payment Due Date:

- ❖ Taxpayer reports key payment information to NDCeCommerce by 3:00p.m. CST.
- ❖ NDCeCommerce transmits reported information to the Department of Revenue and to the ACH System.

Payment Due Date:

- ❖ Pre-authorized funds are electronically withdrawn from taxpayer's designated bank account and credited to State's Treasury account on the business day following the phone call.
- ❖ Department of Revenue updates payment records.
- ❖ Taxpayer mails required Tax return to the Department of Revenue by due date.

Advantages:

- ❖ Simple one-step process for taxpayer once the phone call is made to NDCeCommerce, taxpayer can have confidence that Treasury will receive payment on the due date.
- ❖ No expense for the transaction for the taxpayer.

ACH Credit

This is What Happens:

Business Day Before
Payment Due Date

- ❖ Taxpayer instructs its bank (usually by magnetic tape, diskette, or other media) to send an ACH credit to the State's Treasury for settlement on the payment due date. Taxpayer includes remittance information *Taxpayer I.D., Tax Type, Period covered) with the payment for proper posting to their account.
- ❖ Bank reports information to the ACH System.

Payment Due Date:

- ❖ Funds are electronically deposited to the State's Treasury designated bank account.
- ❖ State Treasury provides detailed payment information to the Department of Revenue.
- ❖ Department of Revenue updates payment records.
- ❖ Taxpayer mails required tax return to Revenue.

Advantages:

- ❖ Less expensive than wire transfers.
- ❖ Treasury receives early morning notification of incoming ACH transactions.
- ❖ No phone calls to 3rd party vendor.

Disadvantages:

- ❖ Taxpayer must add an extra step to payment process by notifying its bank to initiate the ACH credit.
- ❖ Taxpayer increases the chance of late payment if there is a failure in communication with its bank on instructions for initiating the ACH credit.
- ❖ Taxpayer's bank may not have capability of originating ACH transactions.

Wire Transfer

Use as emergency backup only!

Payment Due Date:

- ❖ Taxpayer notifies Tennessee Department of Revenue of payment information for emergency transfer of funds at 615-741-5876.
- ❖ Taxpayer instructs its bank to wire transfer funds to the State's Treasury, including its taxpayer I.D. number in the wire transfer reference field.
- ❖ Treasury receives wire transfer.
- ❖ Treasury notifies Revenue that payment has been received.
- ❖ Revenue updates payment records.
- ❖ Taxpayer mails tax return to Revenue.

Advantages:

- ❖ **Electronic payment can be made if ACH Debit or ACH Credit methods are not operational.**

Disadvantages:

- ❖ Extra step in payment process for taxpayer.
- ❖ Taxpayer has little or no control over what time funds are actually transferred once a wire is requested. It is possible that deadlines could occasionally be missed.
- ❖ Most expensive transaction for taxpayer.
- ❖ Lack of information transferred to update taxpayer's account.

SPECIAL PAYMENT PROCEDURES UNDER THE ELECTRONIC FUNDS TRANSFER PROGRAM

Introduction

In order to maximize the benefit of taxpayer's dollars, the Tennessee General Assembly has authorized the Commissioner of Revenue to require certain tax payments to be made immediately available to the State on or before the payment due date. Rules and regulations have been established by the Department of Revenue for the administration of this legislation, and the Special Payment Procedures contained in this document were implemented on January 1, 1992.

Two payment options are available, that use the Automated Clearing-House (ACH) system to electronically transfer tax payments. The ACH system is a nationwide network designed for this purpose, and is the preferred transaction method for many financial institutions and corporations. The clearing facilities, delivery methods, and settlement services operated by the Federal Reserve System are utilized within this network in order to maintain security and increase the efficiency of transactions.

A Third payment option, Federal Wire Transfer, is only to be used on an emergency basis.

Penalty and interest charges may be incurred if the taxpayer fails to remit by the chosen method. No matter which method is chosen, you must complete the enclosed *Electronic Funds Transfer Agreement*, and return it to the Tennessee Department of Revenue within 10 days after receipt of this package.

The State of Tennessee has retained the services of NDCeCommerce to collect information for the ACH Debit Method. NDCeCommerce maintains eight North American taxpayer phone calls. This service will help to ensure that taxpayers are able to report their payments without delay or inconvenience.

Which Taxpayers Must Use These Special Payment Procedures?

The Tennessee Department of Revenue will notify taxpayers, in the Tax Type categories listed on the next page, that they will be required to use one of the two payment methods, if the taxpayer's average payment is \$10,000.00 or more, or if the taxpayer is also required to file via EDI. Please see the Rules and Regulations for the formulas used in determining the average tax payments. A taxpayer may choose to participate in a special payment procedure voluntarily, even though they would not normally be required to do so. However, voluntary participants are subject to the same rules and regulations as those persons required to make payment in immediately available funds.

Tax Type	Due Dates¹
Franchise and Excise Tax	Dependent upon type of document filed
Liquor by the Drink Tax	15 th of the month
Gross Receipts Tax (except TVA)	1 st and 10 th of the month
Gross Receipts Tax (TVA)	Last day of the month
Alcoholic Beverage Tax	15 th of the month
Beer Tax	20 th of the month
Sales and Use Tax	20 th of the month
Motor Fuel Tax	20 th of the month
Tire Tax	25 th of the month (Quarterly)

¹ If the due date falls on a Saturday, Sunday, or banking holiday, the next working day will be considered the due date.

What Are the Two Payment Options?

1. Automated Clearing-House Debit (ACH Debit).

Under this option, the taxpayer authorizes the State of Tennessee to electronically transfer tax payments from the taxpayer's depository into the State's account. Initiation of the transaction occurs through a toll free telephone call or through use of the Internet from the taxpayer to NDCeCommerce. The call or Internet transaction must be made at least one business day before the tax is due by 3:00 p.m. CST. The actual transfer of funds will take place one business day after the transaction has been initiated. Payment warehousing is available, up to ninety days before a payment is due. The entire transaction must be completed by the due date in order to avoid penalty and interest charges. See **Appendix B1** for detailed instructions.

2. Automated Clearing-House Credit (ACH Credit).

This option allows the taxpayer to initiate ACH transfers using the CCD + format (Cash Concentration and Disbursement). Most depositories or other currency management service providers usually charge a nominal fee for this service. The taxpayer will contact their depository, or currency management service provider, and instruct them to initiate the transaction on the day before the due date. The tax payment will then be withdrawn from the taxpayer's account on the due date and be deposited into the State's account. The funds transfer to the State must be completed by the due date in order to avoid penalty and interest charges. See **Appendix B2** for detailed instructions.

Federal Wire Transfer (Fed Wire).

The wire transfer is available, but it should only be used as an emergency backup for the ACH Debit/Credit options. FedWire is a payment service operated by the Federal Reserve System as a private wire network for transfers between financial institutions having accounts at the Federal Reserve Bank. Most depositories charge a fee for this service. Although FedWires are an adequate means of transferring funds, they are not designed to transmit remittance information necessary for posting of tax payments.

Do I Still Have To File a Return?

In order to avoid penalty and interest charges, you still must file a timely tax return. Taxpayers must also make certain that EFT is indicated on the tax return by writing "EFT" by the Amount Paid line.

APPENDIX B-1

How to Use the ACH Debit Method

1. The taxpayer submits an *Electronic Funds Transfer Agreement* for each tax type to the Department of Revenue with the following information:
 - Taxpayer's Name
 - Taxpayer's Address
 - Taxpayer's Revenue Account Number for that Tax Type
 - Contact Person Name and Telephone Number
 - Taxpayer's Bank Name and Address
 - Taxpayer's Bank American Bank Association (ABA) Number
 - Taxpayer's Bank Account Number
 - For Consolidated Tax Payments – List of all Account Numbers that will be consolidated into one ACH Debit transaction. Payments can only be consolidated if: Accounts have the same FEIN, Tax Type, Filing Frequency, and Bank Account Number

Please also include a copy of a voided check to verify ABA and bank account numbers.

2. Taxpayer will receive a set of reporting instructions with a pin number. There will be separate reporting instructions issued for each tax type being paid by the ACH Debit method. The instruction card will also provide a toll free number and web site address to authorize the transfer of funds. Tax Accounts being consolidated into one ACH Debit transaction will receive only one set of reporting instructions to report these payments.
3. Taxpayer makes a toll free call or uses the Internet to authorize the transfer of funds and provides the following information:
 - Federal or State Code (2-digit code provided by NDCeCommerce)
 - Bank Number (4-digit code provided by NDCeCommerce)
 - Pin Number
 - Password(if using the Internet)
 - Taxpayer ID Number (9-digit assigned tax ID number)
 - Payment Amount
 - Ending Period Covered (MM/YYYY)(Month & Year of return)
 - Tax Code2
 - Settlement Date(MM/DD/YYYY)(Due Date of tax)

Please note that this toll free call to authorize an ACH Debit Transaction must be made before 3:00 p.m. CST one business day prior to the due date.

4. Taxpayer indicates on the tax return(s) that payment has been made via EFT and forwards these returns in a timely fashion to the Department of Revenue. If several outlets are being paid in one ACH Debit transaction, the returns for these outlets must be mailed together to ensure proper posting to the individual outlets.
5. Separate transactions must be made for each tax type or for each tax document type.

2 See page 5, Tax Type Codes – Table 1 for List of Tax Type Codes

APPENDIX B-2

How to Initiate an ACH Credit

1. The taxpayer submits an *Electronic Funds Transfer Agreement* for each tax type to the Department of Revenue with the following information:
 - Taxpayer's Name
 - Taxpayer's Address
 - Taxpayer's Revenue Account Number for the Tax Type
 - Contact Person Name and Telephone Number
 - For Consolidated Tax Payments – List of all Account Numbers that will be consolidated into one ACH Credit Transaction. Payments can only be consolidated if: Accounts have the same FEIN, Tax Type and Filing Frequency
2. Taxpayer must make necessary arrangements with their depository of other cash management service to initiate ACH Transactions using the CCD Plus (CCD+) format. The free form field of the special addenda record must be formatted in accordance with the Tax Payment Banking Convention (TXP) as adopted by NACHA.
3. Taxpayer indicates on the tax return(s) that payment has been made via EFT and forwards these returns in a timely fashion to the Department of Revenue. If several outlets are being paid in one ACH Credit transaction, the returns for these outlets must be mailed together to ensure proper posting to the individual outlets.
4. Separate transactions must be made for each tax type or for each tax document type.
5. Refer to your depository or other cash management service for the *general* procedures and file specifications required in order to initiate an ACH Credit using the CCD+ format.
6. The following information, *unique* to the Tennessee ACH Tax Credit, must be included in the appropriate fields of the ACH entry Detail Record.

Entry Detail Record Format

Field Field Sequence		Field Name	Field Contents	Columns From		
2	M	Transaction Code	“22”	2	3	2
3	M	Receiving DFI ID	“06410709”	4	11	8
4	M	Check Digit	“1”	12	12	1
5	R	DFI Account Number	“82334700bbbbbbb”	13	29	17

- 2 Transaction Code – Mandatory
Transaction Codes have been defined to identify various types of debit and credit entries. For credit entries, this field must be "22" – automated deposit.
- 3 Receiving DFI Transit/routing Number – Mandatory
This field must have a value of "06410709" which will identify the DFI receiving the data for the transaction.
- 4 Receiving DFI Check Digit – Mandatory

This field must have a value of “1” which is the check digit for the receiving DFI transit/routing number above.

5 DFI Account Number – Required

This field must have a value of “82334700_{bbbbbbbbb}” which is the account number of the receiving DFI. This field must be left justified and the trailing nine positions must be blank, indicated above with a “_b”.

The Entry Detail Addenda Record Format for the Tennessee ACH Tax Credit is as follows:

Entry Detail Addenda Record Format

Field Field Sequence	Field Name	Field Contents	Columns From	To	Length
1	M	Record Type Code	“7”	1	1
2	M	Addenda Type Code	“05”	2	2
3	M	Segment ID	“TXP”	4	6
4	M	Separator	“*”	7	7
5	M	Taxpayer ID	Alphanumeric	8	*
6	M	Separator	“*”	*	1
7	M	Tax Type Code	Alphanumeric	*	*
8	M	Separator	“*”	*	1
9	M	Tax Period End Date	YYMMDD	*	*
10	M	Separator	“*”	*	1
11	M	Amount Type Code	“T”	*	*
12	M	Separator	“*”	*	1
13	M	Amount	\$\$\$\$\$\$\$cc	*	*
14	M	Segment Terminator	“\”	*	*
15	M	Reserved	Spaces	*	83
16	M	Special Addenda Sequence Number	Numeric	84	87
17	M	Entry Detail Sequence Number	Numeric	88	94

*Variable

1 Record Type Code – Mandatory

This field must have a value of “7” which will identify this record as an entry detail addenda record.

2 Addenda Type Code – Mandatory

The addenda type code defines the specific interpretation and format for the addenda information contained in the same record. The value for this field is “05” which indicates special addenda information for CCD entries.

3 Segment Identifier – Mandatory

This field must have a value of “TXP” which identifies this as being a tax payment.

4 Separator – Mandatory

This field must be an asterisk (*) which identifies a separator.

5 Taxpayer Identification – Mandatory

This field must be the sending company’s Tennessee Revenue account number of the specific tax being paid.

- 6 Separator – Mandatory
This field must be an asterisk (*) which identifies a separator.
- 7 Tax Type Code – Mandatory
This field is used to determine the tax and document type of the associated payment. See **Tax Type Code – Table 1** for the values to be used.
- 8 Separator – Mandatory
This field must be an asterisk (*) which identifies a separator.
- 9 Tax Period End Date – Mandatory
This field is the ending period covered for the associated tax payment. It must contain six numeric values for the year, month and day. If the ending period is only year and month, enter zeroes for the day.
- 10 Separator – Mandatory
This field must be an asterisk (*) which identifies a separator.
- 11 Amount Type Code – Mandatory
The value of this field must be a “T” to indicate that the payment is a tax payment.
- 12 Separator – Mandatory
This field must be an asterisk (*) which identifies a separator.
- 13 Amount – Mandatory
The amount of this transfer must be the same value as the amount field in the entry detail record. Leading zeroes need not be included.
- 14 Segment Terminator – Mandatory
This field must be a ‘back slash’ (\) to identify it as a segment terminator.³
- 15 Reserved – Mandatory
This field must be filled with spaces
- 16 Special Addenda Sequence Number – Mandatory
The value of this field must be a “1” to indicate one special addenda record present.
- 17 Entry Detail Sequence Number – Mandatory
This field contains the ascending sequence number section of the entry detail record’s trace number. This number is the same as the last 7 digits of the trace number field of the associated entry detail record.

³ Please note that the format of fields 3 (segment identifier) through 14 (segment terminator) must be in accordance with the Tax Payment Banking Convention (TXP) as adopted by NACHA.

Schedules of Receipts

- 1 Gallons received tax paid.**
 - 1A Gallons received, originating state tax-paid.
 - 1B Gallons for export, destination state tax-paid.
 - 1C Gallons received, tax-paid with a payment voucher.
 - 1D Gallons received, transfer fee paid.
 - 1E Gallons imported from another state into taxed storage from a licensed distributor, tax paid.
 - 1F Gallons removed tax-paid and transferred to tax paid storage.
- 2 Gallons received from licensed motor fuel distributors tax unpaid.**
 - 2A Gallons received from terminals, refineries or distributors, origin tax-unpaid.
 - 2B Received tax-unpaid, blendable stock.
 - 2C Gallons received imported, tax-unpaid.
 - 2E Gallons received for export.
 - 2K Gallons of nontaxable fuel received and sold or used for a taxable purpose.
 - 2X Gallons received from suppliers on exchange agreements, tax unpaid.
- 3 Gallons imported from another state direct to customer**
 - 3A Gallons imported from terminals/refineries in state of _____.
 - 3B Gallons imported from bulk storage in another state.
- 4 Gallons imported from another state into tax free storage**
 - 4A Gallons imported from another state into taxed storage.

Schedules of Disbursements

- 5 Gallons delivered tax collected.**
 - 5A Gallons sold to non-licensed distributors, retailers or bulk-end users from in-state terminals.
 - 5B Gallons sold to non-licensed distributors, retailers or bulk-end users for imports from _____.
 - 5C Gallons sold to licensed distributors from in-state terminals.
 - 5D Gallons sold to licensed distributors for imports from _____.
 - 5E Gallons sold to bonded importers, occasional importers or tank wagon importers from _____.
 - 5F Dyed diesel gallons sold for taxable purposes from in-state terminals.
 - 5G Dyed diesel gallons sold for taxable purposes for imports from _____.
 - 5H Gallons sold as export from in-state terminals, originating tax collected.
 - 5I Border Zone 1 MO
 - 5J Border Zone 2 OK
 - 5K Border Zone 3 TX
 - 5L Border Zone 4 LA
 - 5M Border Zone 5 MS
 - 5N Border Zone 6 TN
 - 5O Border Zone 7
 - 5P Border Zone 8
 - 5Q Gallons delivered to customer in tank car, transport or pipeline.
 - 5S Gallons sold as export from refinery (tax collected).
- 6 Gallons delivered to licensed motor fuel distributors – tax not collected.**
 - 6A Gallons sold tax-exempt; customer is a licensed exporter.
 - 6B Gallons sold tax-exempt; customer is a licensed blender.

- 6C Gallons sold tax-exempt; customer is a licensed importer.
- 6D Gallons sold tax-exempt to other licensed distributors/supplier.
- 6E Gallons sold tax-exempt, customer is a licensed LPG vendor.
- 6F Dyed diesel gallons sold for tax-exempt purposes from in-state terminals.
- 6G Dyed diesel gallons sold for tax-exempt purposes for imports from _____.
- 6H Gallons sold or exchanged with qualified refiner.
- 6I Gallons of un-dyed fuel sold to licensed importer/tank wagon operator-importer; tax not pre-collected.
- 6P Gallons sold to suppliers or permissive suppliers; tax not pre-collected.
- 6R Gallons from refinery sold or exchanged with qualified refiner.
- 6X Gallons delivered to suppliers or permissive suppliers on exchange agreements.

7 Gallons exported to state of _____.

- 7A Gallons exported, destination state tax-paid.
- 7B Gallons sold for export, originating state tax-paid.
- 7C Gallons transferred to bulk storage.
- 7D Gallons for free trade zones.
- 7R Gallons exported from refinery storage.

8 Gallons delivered to US Government – tax exempt.

- 8A Gallons sold to U.S. Gov't tax-exempt from in-state.
- 8B Gallons sold to U.S. Gov't tax-exempt for import.
- 8K Kerosene sales (information only)
- 8R Gallons sold to U.S. Gov't tax-exempt from refinery.

9 Gallons delivered to state & local government tax- exempt.

- 9A Gallons sold directly to the state from in-state terminals.
- 9B Gallons sold directly to the state for imports from _____.
- 9C Gallons sold directly to local public schools from in-state terminals.
- 9D Gallons sold directly to local public schools for imports from _____.
- 9E Gallons for county, city or town use.
- 9R Gallons sold to state and local government from refinery.

10 Gallons delivered to other tax exempt entities.

- 10A Gallons delivered to other tax-exempt entities (farmers and fisherman) or non-highway.
- 10B Gallons delivered to tax-exempt licensed general aviation fuel dealers.
- 10C Gallons delivered to tax-exempt common carriers for urban mass transportation.
- 10D Credit card sales to tax-exempt diplomats and missions by dealers.
- 10E Gallons delivered to customers representing uncollectible motor fuel vehicle fuel taxes.
- 10F Gallons delivered to tax-free storage.
- 10G Gallons of other authorized tax-exempt sales.
- 10H Sales to tax-exempt hospitals.
- 10I Gallons delivered tax-exempt for farming.
- 10J Gallons of water white kerosene delivered to consumers or filling stations tax-free.
- 10K Gallons delivered to airlines and self use in own aircraft.
- 10L Gallons of kerosene delivered for heating or production tax-free.
- 10M Gallons of unenhanced diesel product delivered for manufacturing processing or assembly.
- 10N Gallons of unenhanced diesel product delivered for commercial heating and production, other than manufacturing and utilities.
- 10P Gallons delivered for residential heating (totals only).
- 10Q Gallons delivered to utilities.
- 10R Gallons delivered for use as bunker fuel in vessels.
- 10S Gallons of kero-jet sales other than to airlines and self use (sales to non-airlines).
- 10T Indian tribe use.
- 10U Rural water district use.
- 10V Electric coop use.
- 10W Volunteer fire departments.
- 10X Rural ambulance districts.

11 Gallons Diverted.

Tennessee Specific Schedule Codes

TAXPAYER TYPE	SCHEDULE CODE	DESCRIPTION
Blender	B1T	Taxed Product Purchased for Blending
Blender	B1U	Untaxed Product Purchased for Blending
Blender	B2T	Taxed Product Sold or Used by Blender

Terminal Operator	TR	Terminal Operator Schedule of Receipts

Appendix D – Product Codes

Uniform Forms - FTA Product Codes

FTA Motor Fuel Tax Section Uniformity Committee adopted the PIDX code system for the product codes used on the Uniform forms. If a product is not listed, see the procedure for additions/deletions/modifications.

<u>Product</u>	<u>Code</u>
Additives - Miscellaneous	090
Alcohol	123
Ethanol	241
Methanol	243
Aviation Gasoline.....	125
Benzane	248
Blending Components (includes Transmix).....	122
Butane, including butane-propane mix	055
ETBE	249
MTBE	093
Xylene	076
Naphthas	126
Pentanes, including isopentanes.....	059
Raffinates	223
TAME	121
Toluene	199
Transmix	100
Butylene	198
Compressed Natural Gas	224
Diesel Fuel - dye added.....	228
High Sulfur Diesel Fuel - dye added.....	226
Low Sulfur Diesel Fuel - dye added	227
No. 1 Diesel - dye added.....	231
Diesel Fuel - undyed.....	160
Low Sulfur Diesel Fuel #1 - undyed.....	161
Low Sulfur Diesel Fuel #2 - undyed.....	167
No. 1 Fuel Oil - undyed	150
Ethane	052
Ethylene	196

Gasohol	124
Gasohol 10%.....	139
Gasohol 7.7%.....	141
Gasohol 5.7%.....	140
Gasoline	065
Gasoline MTBE	071
Isobutane	058
Jet Fuel	130
Kerosene - undyed.....	142
Low Sulfur Kerosene - undyed	145
High Sulfur Kerosene - undyed	147
Kerosene - dye added	072
Low Sulfur Kerosene - dye added.....	073
High Sulfur Kerosene - dye added.....	074
Liquid Natural Gas	225
Marine Diesel Oil	279
Marine Gas Oil	280
Methane	265
Mineral Oils	281
Propane	054
Propylene	075
Residual Fuel Oil.....	175
Undefined Products	092
Waste Oil	091

Tennessee Specific Product Codes

Product Code	Description
065	Gasoline
071	Gasoline MTBE
072	Kerosene - dye added
073	Low Sulfur Kerosene - dye added
074	High Sulfur Kerosene - dye added
090	Additives - Miscellaneous
092	Undefined Product (Used for Blender Summary)
093	MTBE
100	Transmix
122	Blend Components (includes Transmix)
123	Alcohol
124	Gasohol
125	Aviation Gasoline
130	Jet Fuel
139	Gasohol 10%
140	Gasohol 5.7%
141	Gasohol 7.7%
142	Kerosene – un-dyed
145	Low Sulfur Kerosene – un-dyed
147	High Sulfur Kerosene – un-dyed
150	No. 1 Fuel Oil –un-dyed
160	Diesel Fuel – un-dyed
161	Low Sulfur Diesel Fuel #1 – un-dyed
167	Low Sulfur Diesel Fuel #2 – un-dyed
226	High Sulfur Diesel Fuel - dye added
227	Low Sulfur Diesel Fuel - dye added
228	Diesel Fuel - dye added
231	No 1 Diesel - dye added
241	Ethanol
243	Methanol
249	ETBE

Appendix E – Summary Codes / TIA Codes

FTA Motor Fuel Tax Section Uniformity Committee Tax Information and Amount (TIA) Codes for EDI Tax Filing

Procedures for additions/deletions/modifications

In order to promote consistency and uniformity in the implementation of EDI Motor Fuel Tax Reporting, the Uniformity Committee has developed a listing of data elements and associated Tax Information and Amount (TIA) codes. Any state implementing a new EDI program is asked to utilize codes from this list when mapping motor fuel returns/reports.

Anyone needing a code not on this list should follow the procedure outlined below:

State tax administrator should submit the request to the current Electronic Commerce state co-chairperson of the Uniformity Committee detailing the following information (see list of current chairpersons in the FTA Motor Fuel Tax Section, Uniformity Project Guide) using the FTA Uniform TIA Request Form. The form may be submitted through e-mail or regular mail. The request includes the following:

1. The name and description of the TIA code(s).
2. A brief description of the need for the addition/deletion/modification.
3. Identify the transaction set in which the code will be used.
4. Version of the map to be used.
5. Date TIA code is needed.
6. The line number on the paper return to which the TIA code corresponds.

The current Electronic Commerce state co-chairperson of the Uniformity Committee, upon receipt of the request, shall take the following actions:

1. Distribute copies to Electronic Commerce Committee members for review and discussion.
2. Review the most current list of TIA codes to determine if the requested TIA code already exists.
3. Place the proposed change on the agenda of the next Uniformity Committee Meeting for formal review. It is highly recommended that the requestor be present for any discussion regarding the adoption of the requested TIA Code.
4. If the proposed change is adopted, revise and distribute the updated FTA TIA Code List.
5. If the proposed change is rejected or modified, inform the requesting administrator of the reasons for the rejection and the proper code(s) to be used.

If a Summary Code or TIA code must be assigned before the above mentioned approval process can be completed, the state co-chairperson may assign a TIA code temporarily. This code will be reviewed for adoption at the next Electronic Commerce meeting. To receive a TIA Code before the next Uniformity meeting follow these steps:

1. Complete the FTA Uniformity TIA Code Request Form.
2. Submit the request to the Electronic Commerce state co-chairperson.
3. The state co-chairperson will evaluate the request and respond to the requestor within one week of the receipt of the request.

Summary Code and TIA Code Usage

Summary Codes and TIA codes are used for the following purposes (See complete list of codes below.):

813 Map

1. Header – TIA code 5000 defines the version/publication number of the taxing authority's EDI Implementation Guide.
TIA code 5001 (Total Net Reported) is a check value for determining if all information is included in the EDI file.
2. TOR – Terminal Operator Report or SDR - Supplier/Distributor Report - TIA code 5002 (Physical Inventory) is used to report Ending and/or Beginning Inventory.
3. SDR – Supplier/Distributor Report – TIA code 5003 (Total Due) is a check value used to acknowledge and validate tax liability.
4. CCR – Common Carrier Report – TIA code 5004 (Total Net Transported) is a check value used to acknowledge and validate the report.
5. Summary Code and TIA codes are used for identifying information not found in schedules or able to be derived from the schedules. The SUM loop provides a looping structure allowing multiple TIAs in a uniform format.
6. Schedules – TIA 5005 (Net), 5006 (Gross) and 5008 (Billed) are used to report bill of lading volume details or further define summary detail.

TFS02 Summary Codes

S01 Inventory

- S01A Net Gains / Losses
- S01B Casualty Loss
- S01C Product Transfer – Disbursement
- S01D Product Transfer – Receipt
- S01E Meter Test – Disbursement
- S01F Meter Test – Receipt

Tennessee Specific

- SBBT Blender Beginning Inventory – Tax Paid
- SBET Blender Ending Inventory – Tax Paid
- SBBU Blender Beginning Inventory – Un-taxed
- SBEU Blender Ending Inventory – Un-taxed

S02 Fees

- S02A Transfer / Lust Fee
- S02B Inspection Fee
- S02C Other Environmental Fee
- S02D Gaseous Permit Fee

S03 Credit

- S03A Tax Credit
- S03B Fee Credit

S04 Bad Debt Write-off

- S04A Tax Bad Debt Write-off
- S04B Fee Bad Debt Write-off

S05 General Return

- S05A Gallons/Liters Refined, Distilled or produced
- S05B Petroleum product repackaged into containers of 55 gallons or less
- S05C Ethanol Blended with Gasoline
- S05D Product delivered to Railroad
- S05E Other petroleum products first sold, offered for sale, or used in Nebraska
- S05F Total gallons of Motor Vehicle fuel first sold, offered for sale, or used in Nebraska.
- S05G Untaxed diesel used in a licensed vehicle
- S05H Kerosene blended with diesel and used in a licensed vehicle

Tennessee Specific

- B4T Taxed Product used in Blending
- B4U Untaxed Product used in Blending

FTA Uniformity TIA Codes

The data represented by these TIA codes is not derivable from schedules or represents a check value.		
5000	Version of taxing authority's implementation guide	Header
5001	Total Net Reported	Header
5002	Physical Inventory	TOR, SDR
5003	Total Due	SDR
5004	Total Net Transported	CCR
5005	Net	SCH, SUM
5006	Gross	SCH, SUM
5007	Billed	SCH, SUM
5008	Interest	SUM
5009	Penalty	SUM
5010	Confidential Information	Header, 826
5011-5199	Not used	

Appendix F - Transaction Type Mode Codes

Transaction Type Mode Codes	
Code	Description
J	Truck
R	Rail
B	Barge
PL	Pipeline
BA	Book Adjustment
ST	Stationary Transfer

Vermont	VT	Yucatan	YC
Virginia	VA	Zacatecas	ZT
Washington	WA		
West Virginia	WV		
Wisconsin	WI		
Wyoming	WY		

Appendix H – Frequently Asked Questions

1) Schedule Detail/Product Codes

Q: In Schedule Detail, should specific product codes be reported or should they be rolled up to a product group? As an example, should Dyed Diesel Low Sulfur be reported as product code 226 or should it be reported as product code 228?

A: In this example, report product code 226. Refer to Appendix D. The specific product codes used by Tennessee are listed in bold type.

2) Schedule Detail/Use of FGS Loop

Q: Is it required to use the FGS loop under the Schedule Detail TFS~T3? Couldn't the TFS~T3, N1~CA, N1~SE, N1~SF, N1~ST, N1~BY segments be repeated for every Bill of Lading?

A: If two schedule transactions have identical information except for Bill of Lading Number, Bill of Lading Date and Gallons, the FGS loop must be repeated under the TFS~T3. Repeating the FGS loop cuts down on the size of the file being submitted which is one of the benefits of using EDI.

3) Bill of Lading Dates

Q: Is it a requirement that Bill of Lading Dates must fall within the filing period being reported?

A: Yes

4) State/Country Abbreviations

Q: Which state abbreviations should be used for origins and/or destinations that are not within the United States.

A: Refer to Appendix G. Abbreviations for the United States, Canada and Mexico are listed. If the origin/destination falls outside of these countries, use the standard two-letter abbreviation approved by the US Post Office.

5) Summary Schedules/No Activity

Q: On summary schedules such as 505A Gallons Refined, if we have no refinery gallons to report for the month, is the summary segment required?

A: The summary segments are required. The products to be reported are listed in the 'comments' area for each segment. Net Gallons would be 0 (zero).

6) REF Segment: IRS or N/A

Q: What is the usage of the REF02 in the "Relationship to the Transaction Information" and how should it be populated?

A: The segment denotes whether the information applies to the IRS. Since the information being reported does not apply to the IRS, it should be populated as N/A.

7) Taxpayer Feedback

Q: How will Tennessee report filing errors to the taxpayer?

A: Errors will be handled by a combination of e-mail and phone calls. Errors will basically fall under one of two categories, either A) EDI Syntax or B) Reporting Errors. Reporting errors include filing under the wrong schedule code or missing schedule data.

8) Correcting a filing

Q: What are the requirements for correcting a filing?

A: On an Original EDI filing with syntax errors, the taxpayer will correct the errors and re-submit a complete filing. On an original filing with schedule errors, Tennessee will contact the taxpayer to request the file be corrected and re-submitted.

9) Amended processing

Q: I found we had missed a bill of lading for a previous month. What are the procedures for correcting the filing?

A: Procedures for correcting a previous month's filings can be found in appendix J.

10) Identification of resubmitted records.

Q: Is any identification (like Sequence Error ID Number) required on resubmitted records?

A: The Sequence Error ID Number is required in all filings. There is no additional identification required on resubmitted files except to 1) append the file name as described in the file naming section and 2) indicate on the BTI13/BTI14 whether this is an original, corrected or amended filing.

11) Diversion Numbers

Q: How are diversion numbers reported using EDI?

A: The FTA Implementation Guide does not contain a segment for reporting diversion numbers. Tennessee requires the Bill of Lading number on diversions, as on every other schedule. Taxpayers will continue to request diversion numbers following standard procedures.

12) Diversion Destination

Q: How are original and revised destination formatted for diversions?

A: The original destination is not formatted in the EDI map. The revised (actual) destination is reported in the N1destination segment.

13) Diversion Buyer

Q: Is the original or diverted buyer reported for diversions?

A: Report the revised (or actual) buyer.

13) Timely Filing

Q: Is a return considered filed on time as soon as it's received or as soon as it's validated with no errors?

A: Returns are considered filed when received and timely filed if received on or before the filing due date.

14) Turnaround Time

Q: Once an EDI file is received by the state, how soon will Tennessee provide feedback on filing errors?

A: When there are filing errors, such as an invalid product, the wrong schedule code, or missing FEINS, the state will contact you as soon as possible so you can correct the errors and re-file. Early filing will give the state the opportunity to provide a quicker response.

15) Total Gallons TIA

Q: Does the TIA for total net gallons come from one of the lines on the return?

A: This figure represents the sum of net gallons across all schedules, and includes all products. It is a control number used for verification purposes. It does not represent any line on the return.

16) Rejected Filing

Q: What type of errors would cause a filing to be rejected?

A: The most common errors that cause filings to be rejected include invalid EDI syntax, control segments incorrectly calculating net gallons or tax amount, missing or invalid dates, missing or invalid account numbers, invalid FEINS, products invalid for Tennessee, invalid schedule codes, missing gallons, missing Terminal Control Numbers, use of an incorrect schedule code for the type of transaction, (i.e., reporting an export on a schedule 1).

17) Sample Filing

Q: Would you provide a sample EDI file?

A: A sample EDI file has been included in this guide. Please see appendix I.

Appendix I - Sample EDI files

Distributor (SDR)

(Formatted with carriage returns for viewing – in an actual filing, carriage returns would be omitted.)

Appendix J – Amending Returns

What constitutes an Amended Return?

The state of Tennessee will continue to require amended returns to be filed with the DOR. An amended return transaction is any transaction with a BOL date outside current reporting period including “Late Load” transmissions. Situations that would constitute an amended return would be adjustments and/or corrections from a previous reporting period such as a transaction that had been reported to an incorrect schedule.

What is not an Amended Return?

If the EDI transmission for any original return is rejected for EDI syntax errors, the filer will receive notification via a 997 acknowledgment. The file is not required to be resubmitted as an amended return, but should be corrected and resubmitted as a resubmission of the original.

This is not considered an amended process.

If the file is accepted by the EDI syntax check program, but a data error is found by the “state audit check” program, (an example would be too many missing FEINs) the state will notify the filer to correct and resubmit as a resubmission of the original transmission. *This is not considered an amended process.*

What is required for an Amended Filing?

The Tennessee DOR provides for two separate methods of electronic amended return filings. Detailed examples of each method are included in the EDI guide.

With the first method, only amended transactions need to be filed; do not file a full replacement for an amended return filing. This would include transactions not previously reported as well as corrections. When correcting a previously reported transaction, the filing must reverse the original transaction as well as add the corrected transaction. Each amended filing period can be submitted as a separate electronic submission with the naming convention as detailed in the current EDI guide.

The second method allows combined filings. Multiple reporting periods can be included within a single filing transmission, however each reported filing period must be contained within an individual EDI SE/SE loop. The 4030 standard mapping was designed with a single set of summary segments (within each ST/SE loop), that carry return information which cannot be calculated from the detail schedule transactions such as product transfers, inventory figures, penalty amount, credit amount, and interest amount. Therefore, each return must be in its own 813 (ST/SE loop). All transactions in an 813 must have a BOL date within the period dated indicated for that 813. Test and production data cannot be combined in a single data transmission.

What is required in the EDI file for Amended Returns?

Just as in the original filing, the TIA for Total Amount Due and Total Gallons are required. These totals should reflect the amounts for the amended filing only. Summary information such as product transfers, inventory figures, penalty amount, credit amount, and interest amount are required when there has been a change from the original return. For example, if inventory for gasoline was originally 1000, but is now 900, the EDI file should include an inventory amount of -100.

For amended filing, summary segments are not required unless there has been a change. However, filers can include all summary segments if desired, just making sure the amount field is 0 if there has been no change from the original filing. For examples, see Appendix I, which contains sample EDI files.

Summary is accumulated with each amended filing. For example, if the Distributor return was filed originally with inventory for gasoline of 1000, the first amended return for the period included gasoline inventory of -100, and the second amended return for the period included (+) 50 gallons, the accumulated changes kept by TDOR will show gasoline inventory at 950 gallons.

How will EFT Payments be affected?

Each filing transmission that has a payment due will require a separate EFT payment, regardless if multiple filing periods have been submitted in a single transmission.

What if a paper original requires an Amendment?

Hard copy paper returns will be required for any reporting period that has not been previously filed electronically. Electronic filing for amended returns will be required for any reporting period that has previously been filed electronically.

As an example, if the first "live" electronic filing for a company is January 2002 for the December 2001 reporting period, any transactions prior to the December filing period should be filed as a paper amended return.

What is the timeline?

Development of the TDOR amended return process is expected to be complete in July 2002. Prior to July 2002, filers are requested to provide the state with paper copies of amended transactions. Filers will be notified in writing when the state is ready to begin electronic amended filing.

How will Amended EDI be phased into use?

Initially, the state audit program will flag transmissions with a warning level message for files containing transactions outside the current reporting period that have not been segregated into a separate EDI ST/SE loop or submitted as a separate filing. The state will have the ability to change this audit program to produce a critical level error message and reject the transmission.

How will Amended penalties and interest be accumulated?

If the original return is filed in a timely manner, the amended transactions will be charged interest, however a delinquency penalty will not be applied. If the original return is not filed in a timely manner, both interest and penalty charges will apply.
